Lihue Nicolas Leiva

Frontend / Full Stack Software Developer | Specialized in Angular, TypeScript, NodeJS & Firebase

Mendoza, Argentina | leivalihue@gmail.com | +54 9 2615716234
www.linkedin.com/in/lihue-leiva-frontend-developer | github.com/lihueleiva | lihueleiva.github.io/lihueleiva-dev-portfolio

Professional Summary:

Frontend / Full Stack Software Developer with strong hands-on experience building scalable web applications, multi-tenant SaaS platforms, and high-conversion e-commerce systems using Angular (v17–v22), TypeScript, JavaScript, NodeJS, and Google Firebase. Specialized in 100% Standalone Component architectures, declarative state management with Angular Signals, RxJS, OnPush change detection, Server-Side Rendering (SSR), and strict schema validation with Zod. Proven track record of developing mission-critical transactional workflows (Mercado Pago API integrations, atomic inventory deduction, soft-lock booking engines, client-side media pipelines, dynamic multi-tenant SEO, and CI/CD automation).

Professional Experience & Key Projects:

Vertex Solutions

Multi-Tenant White-Label SaaS E-Commerce Platform | Co-Creator & Frontend Software Developer

June 2025 - Present | Mendoza, Argentina

Responsibilities & Key Achievements:

- Developed and maintained the storefront and merchant backoffice (`/admin`) using Angular 20/22 (Standalone Components, Signals) and shared Zod data contracts (`@vertex/contracts`) for multi-tenant stores isolated by `storeId`.
- Implemented dynamic per-variant product pricing, automated bank transfer discount calculations, and persistent reactive cart state management backed by `localStorage`.
- Integrated Mercado Pago API checkout workflows and Firebase Cloud Functions, implementing direct stock assignment and atomic inventory deduction.
- Engineered a multi-tenant image upload pipeline in Firebase Storage featuring client-side HEIC/HEIF to WebP conversion (`heic2any`) and strict MIME validation.
- Built `SeoService` with dynamic Open Graph metadata rendering for social crawlers (WhatsApp/Meta), infinite marquee product sliders, an admin catalog density selector, and automated CORS bucket provisioning.

Technologies used: Angular 22, TypeScript, Angular Signals, RxJS, NodeJS, Firebase (Firestore, Functions v2, Auth, Storage, Hosting), Zod, Mercado Pago API, SCSS, Cypress, Playwright, GitHub Actions.

GEO Tracker

High-Mountain Expedition E-Commerce, Booking Engine & Live CMS | Frontend / Full Stack Developer

2026 | Mendoza, Argentina

Responsibilities & Key Achievements:

- Architected and developed a high-performance Server-Side Rendered (SSR) web application in Angular 22 enforcing `ChangeDetectionStrategy.OnPush`, modern Control Flow (`@if`, `@for`, `@switch`), and lazy-loaded routes for mountaineering expeditions across Patagonia and the Andes.
- Engineered a signal-driven `BookingService` supporting atomic slot deduction per departure date and a dual pricing model: credit card installments via Mercado Pago and discounted bank transfers with a 2-hour temporary slot reservation ("Soft-Lock") and receipt upload workflow.
- Developed a 4-module administrative backoffice to audit payment receipts (approving orders or rejecting them with automatic slot restoration), manage expedition catalogs and departures, edit live homepage Hero/Trust Pillars and bank account details (CBU/Alias), and convert leads via automated WhatsApp links.

Technologies used: Angular 22, Angular SSR, Express, TypeScript 6, Angular Signals, OnPush, Modular SCSS, Lucide Icons, Vitest.

InkSync & Vertex Ecosystem Landings

SaaS Studio Manager (CRM, Calendar & CMS) & B2B SaaS Landings | Full Stack Angular Developer

2025 - 2026 | Mendoza, Argentina

- **InkSync:** Integrated client CRM, interactive appointment scheduling dialogs, and consultation-to-appointment conversion workflows backed by Cloud Firestore, alongside Firebase Auth and a CRUD portfolio manager connected to Firebase Storage.
- **Vertex Landings:** Designed and implemented high-conversion B2B promotional web apps featuring responsive Bento Grid layouts, interactive multi-state admin mockups, and mobile-first micro-interactions.

Technologies used: Angular 20, Angular SSR, Angular Material, Angular CDK, TypeScript, Firebase, SCSS, Bootstrap 5, AOS.

Technical Skills (ATS Keywords):

Frontend: Angular (v17, v19, v20, v22), TypeScript, JavaScript (ES6+), Angular Signals, RxJS, NgRx, Angular SSR, HTML5, CSS3, SCSS, Bootstrap 5, Angular Material, Reactive Forms, Zod.

Backend & Cloud: NodeJS, Firebase Cloud Functions v2, Cloud Firestore, Firebase Auth (Google OAuth & RBAC Custom Claims), Firebase Storage, Express.js, REST APIs, Mercado Pago API.

Testing, DevOps & Methodologies: Git, GitHub Actions (CI/CD), Docker, Jasmine, Karma, Vitest, Cypress (E2E), Playwright, ESLint, Prettier, Agile, Scrum, Kanban, OOP, Prompt Engineering.

Languages:

Spanish: Native | English: Technical Professional (B2/C1 - Technical documentation, code authoring, and professional IT communication)

Education & Certifications:

Agile Fundamentals: Including Scrum and Kanban - Udemy | Angular - DevTalles (Prof. Fernando Herrera) | Angular - CoderHouse
Object-Oriented Programming (OOP) & JavaScript - EDteam | Angular, JavaScript Intermediate & Prompt Engineering - Sololearn | Web Development (CSS, HTML & JavaScript) - CoderHouse
